MS ID#: BIORXIV/2020/323014

MS TITLE: Standard and Non-Standard Measurements of Acidity and the Bacterial Ecology of Northern Temperate Mineral Soils

Dear Michael J Braus;

This is an automatic message acknowledging your online submission to bioRxiv.

Completion of article screening typically completes within 48 hours, however, it may take longer over a weekend or holiday.

If you would like to make changes to your submission prior to it being approved for posting on bioRxiv, please contact bioRxiv at biorxiv@cshl.edu and we will return your submission. Do not create a new submission to update your manuscript as this will create a duplicate submission and will significantly delay the screening of your manuscript.

In addition, note that bioRxiv now allows you to save time submitting to certain journals or review services by transmitting your manuscript files and metadata directly. To submit your paper to a journal, please click on the link below to access your "Submit bioRxiv Preprint to a Journal or Peer Review" queue:

(https://submit.biorxiv.org/submission/queue?queueName=send_paper_away_author)

Thank you for your submission.

Best wishes,
The bioRxiv team
